Sure-Chek® brand healthcare fabrics are the original healthcare fabrics that were patented for use as protective covering fabrics and today are the standard in the industry. Sure-Chek® healthcare fabrics were developed in cooperation with healthcare professionals to provide fabrics that are comfortable, safe and effective for use in healthcare facilities, prison industries, jails, camps, and dormitories. These thermoplastic fabric composites are strong, durable, antimicrobial, antistatic, flame resistant, stain, odor, and fluid resistant

WHY Sure-Chek® Vinyl:

Stain Resistant

Most oils, greases, and contaminants may be wiped off with soap, water or mild cleansers. Curtains are easily cleaned in place and maintain a fresh look.

Antistatic

Sure-Chek® fabrics are specially formulated with an durable antistatic property, “Anstat®.” It prevents the build-up or retention of electrostatic charges that could interfere with the functioning of sensitive life support equipment.

Odor Resistant

Sure-Chek® fabrics have been treated to resist bacterial odors. Objectionable organic odors are decreased as a result of the active protection against odor-forming bacterial growth on fabric surfaces.

Durable

Sure-Chek® fabrics are incredibly strong, withstanding severe wear and abuse. Extra strength and tear resistance mean extended curtain life.

Antimicrobial to protect the fabric

A controlled release system continually sends the antimicrobial agent to the fabric surface. This built-in protection lasts the life of the fabric and is far superior to topical treatments.

Decorative

Sure-Chek® fabrics offer an attractive selection of contemporary colors with a crisp linen finish.
